

Accessible document quick reference

Six principles, four tools. DA-103 Document & PDF accessibility fundamentals · Promet Source

Principle	Word	PowerPoint / Excel	PDF
Structure	Heading 1/2/3 styles, real lists	Title placeholder on every slide; sheet names and defined tables	Tags, generated from the source
Navigation	Navigation Pane, table of contents	Outline View; named sheets	Bookmarks from headings
Tables	Header row plus repeat across pages	One table per sheet, no blank spacer rows	Tagged table headers
Alt text	Right-click, View Alt Text, or mark decorative	Alt text on charts, data kept on the sheet	Figure alternate text
Color	4.5:1 normal, 3:1 large, never color alone	Status column, not fill color	Manual contrast check
Properties	File > Info: Title, author, language	Same	File > Properties: Title and language

Before you publish, every time

- Run Review > Check Accessibility and clear every Error.
- Open the Navigation Pane or Outline View and read your own structure.
- Read your alt text and ask whether it tells the reader what the image tells everyone else.
- Check that nothing depends on color alone.
- Set the Title and the language.
- Export with structure tags. Never print to PDF.
- Open the PDF, select text, check the Tags panel, look at the browser tab.
